EL-WIN-USB

When Lascar launched its first USB data logger, its aim was to make data logging simple for even the most inexperienced user. Eight years later and simplicity remains a key component in our design. EL-WIN-USB V6.0 will make your data logging experience even easier.

- Clear and large graphics for effortless programming and data download
- Faster graphing for larger data sets
- New graphing for users of EL-USB-5 data loggers
- A software platform to support all of Lascar's new 2012 product launches
